

Modern, well-designed, cloud-based software. NaVetor makes running your practice like second nature.

As the sea turtle is nature's best navigator, NaVetor always helps you find your way.

Just as nature finds a way to simplify complex systems, NaVetor makes your workday and workflow beautifully easy. With a complete balance of design and intelligence, NaVetor is the modern, efficient, beautifully easy veterinary software designed to help you navigate your veterinary business.

Built from the cloud up.

We're building NaVetor today using advanced cloud technology that can accommodate the workflow enhancements of tomorrow. Always moving forward with new capabilities, integrations, and award-winning support from Patterson Veterinary, we aim to help veterinarians practice medicine without boundaries.

Beautiful software that's also a great value.

Your monthly subscription includes all the features you would expect, plus a mobile app, 24/7 technical support, boarding module, and integrations for credit card processing, microchip identification, and email/text messaging. You'll also receive a Patterson customer success manager to help your transition every step of the way.
